

PROGRAM OVERVIEW

Taking a truly multidisciplinary approach, world-class experts share knowledge spanning surgery, radiation oncology, medical oncology, pathology, and primary care. Researchers also share innovative therapies and evidence-based approaches that can be translated into surgical and clinical practice.

An interactive, half-day session dedicated to survivorship will shine a spotlight on how health professionals can advocate for, and support, breast cancer patients and their families as they navigate recovery. Diverse topics will take a holistic approach and cover screening, nutrition, sexual health, bone health, and exercise with perspectives from patients and patient advocates.

TARGET AUDIENCE

We welcome participation all those involved in the multidisciplinary care of breast cancer patients and survivors. Our conference presents information of interest to:

- General Surgeons, Breast Surgeons, and Surgical Oncologists
- Radiation Oncologists
- Medical Oncologists
- Pathologists
- Family Physicians
- Nurses
- Trainees
